

Washington

- **Bellingham area** – three new faults with evidence for Holocene activity based on work by Kelsey and others (in press at JGR).
- **Boulder Creek/Canyon Creek faults** – revise rate information for the Boulder Creek fault and add the Canyon Creek fault to database and map.
- **Tacoma fault** – not on 2008 map (single paleoearthquake)
- **Southern Whidbey Island fault** – revise with rate info from 2008 JGR paper
- **Darrington-Devils Mountain fault** (single Holocene earthquake near Lake Cavanaugh)
- **Lake Creek-Boundary Creek fault** (at least two paleoearthquakes in last 2500 years)
- **Saddle Mountain West/Canyon River faults** – new fault strands, new ages on paleoearthquakes
- **Wenas Valley fault** – new fault
- **Boylston Mountains fault** – new fault

Oregon

- **Blue Ridge fault** – new fault, late P/early Holocene earthquake
- **Dillman Meadows fault** (need thesis from Boise State to evaluate further)
